HB

SUMMARY

I am a detail-oriented Backend & Full Stack Developer with a solid foundation in Data Structures & Algorithms in C . I possess hands-on experience in building scalable web applications, developing REST APIs, and implementing authentication systems using the MERN stack. I actively engage in hackathons and collaborative projects, emphasizing clean architecture and effective problem-solving

EDUCATION

Bachelor of Technology (B.Tech)

JECRC University

📅 2024 - 2028   📍 Jaipur

PROJECTS

Full Stack Single-Vendor E-Commerce Platform

📅 01/2026

Full Stack Single-Vendor E-Commerce Platform
- Developed a complete single-owner e-commerce platform with user authentication, product management, and order handling
- Implemented secure JWT-based authentication and role-based access control
- Built RESTful APIs for products, users, cart, and orders following MVC architecture
- Designed a responsive UI using React and Tailwind CSS
- Integrated backend with frontend and handled error states, validations, and API responses

Portfolio Website

📅 01/2026

Personal portfolio website to display skills and projects
- Designed and developed a personal portfolio to showcase projects and skills
- Implemented a contact form with backend email integration
- Optimized UI for responsiveness and performance

SKILLS

Group Title

C	JavaScript	python
React	Data Structures	MySQL
Node.js	Express.js	JWT
Your Skill	HTML	Tailwind
MongoDB	Mongoose	Git
Postman	Vercel	MVC	Render
IoT		

Group Title

MERN Stack Development

INTERESTS

Interests

Enjoys exploring Competitive Programming, Hackathons, and Artificial Intelligence & Internet of Things
