 - DBMS

PROFESSIONAL SUMMARY

Backend-focused Full-Stack Developer with hands-on experience building scalable MERN applications and RESTful APIs. Currently developing AttendFlow, an Education ERP SaaS platform focused on solving real-world administrative challenges. Strong foundation in Data Structures & Algorithms with a passion for backend engineering, product development, and scalable software systems.

PROJECTS

ATTENDFLOW – EDUCATION ERP SAAS PLATFORM | MERN STACK

- Developing a scalable ERP platform for schools and colleges with role-based access for Admin, Teachers, Students, and Parents.
- Built secure JWT authentication, attendance management, timetable, notices, leave management, and academic workflow modules.
- Designed RESTful APIs with MongoDB, Express.js, and Node.js following modular backend architecture.
- Focused on scalability, clean code practices, and production-ready backend development.

BAKESTORY – E-COMMERCE PLATFORM

- Developed a full-stack bakery e-commerce application with secure JWT authentication and role-based admin management.
- Implemented product management, shopping cart, order processing, and admin dashboard functionalities.
- Built RESTful APIs with MongoDB and Express.js while ensuring secure authentication and efficient database operations.
- Integrated image uploads, order history, and email notifications to enhance user experience.

EDUCATION

2024 - 2028
Bachelor Of Technology (B.Tech)
JECRC University , Jaipur, RJ

HOBBIES & INTEREST

- Exploring Competitive Programming
- Active Participant in Hackathons
- Exploring Artificial Intelligence & Internet of Things.

POSITIONS OF RESPONSIBILITY

- School Head representing 4,000+ students.
- Core team member at JU Verse.
